

## Visco No. 7 Varnish

### Properties

Two-part colourless polyurethane finishing varnish for interior and exterior protection (consult us) of floors and walls.

Visco No. 7 varnish consists of a base (Part A) and a hardener (Part B). It forms a highly durable film that is solvent-free and does not yellow. It protects cements and epoxy resins. Its viscosity provides a way to check that the base and hardener were correctly mixed. And its whitish appearance during application provides a way to see which surfaces have already been coated so that bare areas can be avoided.

### Preparation of the substrate

The floor must be clean and dry. On raw concrete, clean using MA's cleaning acid for new screed and cement clouds, and then rinse with water. On varnished concrete to perform repairs, sand using 120 grade sandpaper before application.

### Mixing

Firstly, shake the base (Part A) container. Add the hardener (Part B) and mix mechanically at low speed for three minutes. Leave to rest for 10 minutes.

Proportions of the final mix: 9 volumes of base (Part A) + 1 volume of hardener (Part B).

Pot life is approximately 1 hour.

### Application

One to three coats according to the porosity and intended use, using an 8 mm microfibre roller or a gun.

Temperature of between 10 and 28°C. Possible sanding between layers. Dust-free after 2 hours and re-coverable after approximately 6 hours. Can be walked on with care after 24 hours.

Hard after 5 days. Lay carpets after 7 days.

### Characteristics

**Density:** Approximately 1.

**VOC content (Parts A+B):** 20g/l.

**Product storage:** Protect from sun, rain and frost, in a cool dry place.

Shelf life: six months in original packaging, unopened.

**Yield:** 100 to 150 g/m<sup>2</sup> 6 to 8 m<sup>2</sup> per litre and per coat on porous floors, 8 to 10 m<sup>2</sup> per litre and per coat for non-porous floors such as PVC or resin. Plan at least two coats.

**Cleaning of equipment:** with water

**Packaging (Part A + Part B):** 1L (0.9+0.1 litres); 5L (4.5+0.5 litres) and 10L (9+1 litres).

**Appearance:** satin or matt
